MEMORANDUM FOR Director, Installation Management Agency

SUBJECT: Performance-Based Remediation Contracting Candidate Installations for Fiscal Years 2004-2005

1. Reference. Army Environmental Cleanup Strategy, April 2003.
2. This announces the FY04-05 potential candidate installations (encl) for participation in the Performance Based Environmental Remediation Contracting program. This program expands last year's Guaranteed Fixed Price Remediation (GFPR) initiative.
3. The Army continues to pursue the most cost effective, technically sound, and results-oriented environmental remediation strategies as directed by the Army Environmental Cleanup Strategy. In FY03, OACSIM established the Army as the leader among the services in meeting performance-based contracting goals for environmental remediation.
4. The Army Environmental Cleanup Strategy expands these successes by identifying common and consistent objectives across the Army's Cleanup Program. To attain these objectives, the Army will execute bold, results oriented, and innovative strategies, such as Performance Based Remediation Contracting.
5. The enclosed list of candidate installations compliments our goal of 50% performance-based contracts by the end of FY05 for the Army's Active Installation Restoration Program (IRP). The USAEC will lead this effort by coordinating with IMA to create implementation teams at candidate installations to oversee the performance-based remediation contracts.
